

OT INFRASTRUCTURE & SECURITY CYBERSECURITY ASSESSMENT

Are your plant floor systems as reliable, secure, and protected as they should be? A Cybersecurity Assessment of your OT Infrastructure will help you better understand your cyber-related risks. The assessment, conducted by the Interstates OT Infrastructure and Security team, provides valuable feedback to assist you in managing your manufacturing control systems by prioritizing critical issues. This information allows you to make informed decisions regarding security, risk exposure, and overall system condition. Interstates can help you assess, design, implement and support a “best in class” infrastructure that meets your specific manufacturing requirements and aligns with your cybersecurity risk appetite.

ASSESSMENT AREAS

Asset Identification

- Inventory of Assets
- Rating of Risks and Criticality

Management Roles Review

- Procedures and Standards
- Network Ownership

Network Infrastructure Layout

- Security
- Topology
- Administration

Virus Protection Implementation

- Identify Vulnerabilities
- Threat Assessment

Patch Management Implementation

- Activities and Procedures
- Baseline Assessment

Disaster Recovery Planning

- Hardware Sparing
- Backup and Recovery Procedures

Version Control / Change Management

- Application Tracking
- Access Control
- Standardization

INTERSTATES OT EXPERIENCE

- Facilitated a global pet food company design, implement, and support a multi-location- centrally managed control systems infrastructure
- Partnered with a “Fortune 100” company in developing internal infrastructure security standards
- Worked with clientele to create action plans and improvement processes to meet internal and external security standards
- Completed company-wide control system assessments for clients
- Employs a professional staff with control systems experience and IT certifications

ASSESSMENT OUTLINE

- Pre-Assessment Kickoff Meeting
- Systems and Processes Inventory
- On-site Assessment Trip (3-5 days)
- Document security and risk findings
- Identify Priorities
- Suggest Action Plans
