

BatchMATE®

BatchMATE® - your micro ingredient hand-add station.

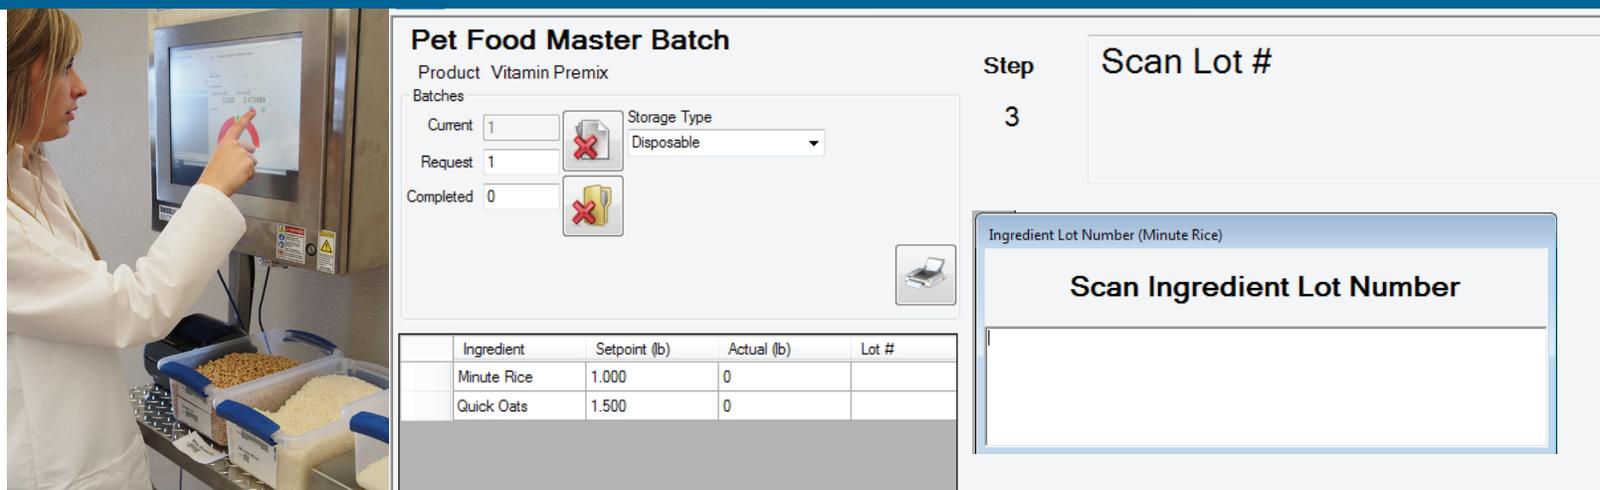

Minimize the time and effort it takes to accurately store lot numbers and weigh ingredients on the plant floor.

Automating your hand batching process

With BatchMATE®, minimize the time and effort of accurately storing lot numbers and weighing ingredients on the plant floor.

Hand adding ingredients is a necessary but often error-prone step in the manufacturing process. The most common errors include mistakenly **recording lot numbers**, **adding the wrong ingredient** and **inaccurately scaling ingredients**. These simple mistakes cause an inconsistency in your product.

BatchMATE was designed to eliminate these errors while quickly guiding the operator through the weighment process.

Ingredient Accuracy

BatchMATE ensures ingredient accuracy by prompting the operator to scan the ingredient's ID number. Before scaling the ingredient, the correct ID must be scanned.

Lot Tracking

Lot numbers are scanned immediately following the ingredient. A unique code is assigned to each campaign and is printed to be placed on the campaign bucket. Prior to adding the weight to the batch, the operator will scan the code, recording all ingredients and lot numbers in BatchLOGIX.

Recipe Management

BatchMATE integrates with your recipe management system. When you release a campaign, BatchMATE downloads the recipe and is ready for the operator to fulfill the order.

Scaling

Weighments

BatchMATE can be configured with multiple scales of different capacities and resolutions to maintain specific ingredient tolerances. This allows for versatile configurations and allows the system to encompass different sets of ingredients.

User Login

Employees are quickly logged on by either scanning a barcode on their employee badge, entering a password or by using the RFID chip in their employee badge to connect them to BatchMATE.

BatchLOGIX®

BatchMATE works seamlessly with BatchLOGIX allowing all of the advantages of recipe management, lot tracking, batch historian, and reporting to be interpreted across all the manual and automated equipment on the plant floor.

PlantLOGIX™

NorthWind

The NorthWind PlantLOGIX Suite of software is a powerful tool designed to streamline and simplify factory processes, taking your plant to the next level and allowing you to get the most out of your automation system.
