

Boost Immune Health with All-Natural BENE0's

Orafti[®] inulin

BENE0's Orafti Inulin improves intestinal well-being throughout all life stages. Derived from chicory roots, Orafti Inulin is a verified prebiotic, supported by extensive research.

- All-Natural
- Enhanced Immune Health
- Leaves Pets Feeling Full & Satisfied
- Weight Management
- Odor Reduction
- Improves Intestinal Well-being

Prebiotics oraffi inulin and oligofructose are naturally extracted from chicory roots and not synthesized from sugar, providing pets with a healthy soluble fiber source.

All-Natural

Prebiotics oraffi inulin and oligofructose are naturally extracted from chicory roots and not synthesized from sugar, providing pets with a healthy soluble fiber source. It can also serve as a texturizer for technological applications.

Unlike competitors, BENE0's Oraffi Inulin is sourced from locations in two different hemispheres, enabling opposite production seasons and protection should one endure a natural disaster. Developed 100% from vegetable origins, Beneo Oraffi Inulin is guaranteed GMO-free and always non-Chinese.

BENE0 is dedicated to creating a more sustainable future. BENE0's Oraffi Inulin is sourced responsibly and backed by a commitment to reduce energy consumption by 50% over 30 years.

Enhanced Immune Health

With 70% of the immune system residing in the intestinal tract, a healthy microbiome, the collection of microbes that live inside the body, is key to a healthy immune system. BENE0 inulin prebiotics stimulate the pet's natural defenses, boosting the pet's ability to fight infections.

Improved Nutrient Absorption

Part of the enhanced digestive health benefit includes improved nutrient absorption, specifically the more efficient adsorption of calcium and magnesium. BENE0's Oraffi Inulin also reduces intestinal pH, creating a more acidic environment.

Weight Management

An estimated 60% of cats and 56% of dogs in the United States suffer from obesity or excessive weight according to the Association for Pet Obesity Prevention. The fermentative end-products of BENE0's Oraffi Inulin increase feelings of satiety, leaving the pet full and satisfied and less likely to overeat.

Odor Reduction

BENE0's Oraffi Inulin prebiotics selectively stimulate the growth and activity of beneficial bacteria in the colon, which reduces constipation, improves stool quality, promotes better defaecation patterns, and decreases odorous compounds.

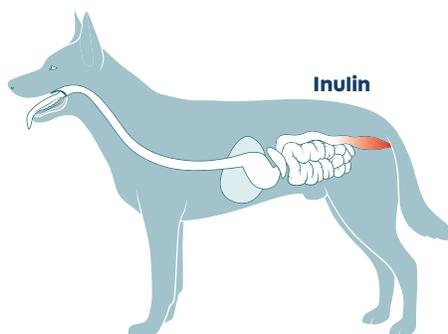

Fermented throughout the Large Intestine

Pets ferment short-chain fructose quickly causing all fermentation to occur at the beginning of digestion. Long-chain fructose takes longer to ferment, but without short-chain fructose, all fermentation takes place at the end of digestion. BENE0's Oraffi Inulin is the only prebiotic containing a natural blend of varying chain-lengths fructose to ensure prebiotics are delivered throughout the colon, not just at the beginning or the end.

To improve pets' intestinal well-being with an all-natural prebiotic delivered throughout digestion, contact your Trow Nutrition representative, call 800.365.1357 or email info@trouwnutrition.com.
