

Res-Tek is a leading US manufacturer dedicated to the formulation and production of resin based acrylic flooring systems, cementitious urethane, epoxies, and polyaspartics. Res-Tek's mission is to provide customized flooring systems tailored to the unique needs of each facility through superior products and on-site support. Whether you are revitalizing an existing floor or building your facility from the ground up, Res-Tek is your partner for high-performance, commercial, and industrial flooring.

Exceptional Products, Innovative Solutions

MAC-Guard™ Acrylic Flooring System

Methyl-Methacrylate (MMA) Flooring Systems

Floors that cure in 1 hour. MAC-Guard™ flooring systems provide the fastest route to a great floor. MMA has a fast and efficient curing process that allows for the floor to be returned to full service within one hour after the final coat at a wide variety of temperatures (-15°F to 100°F).

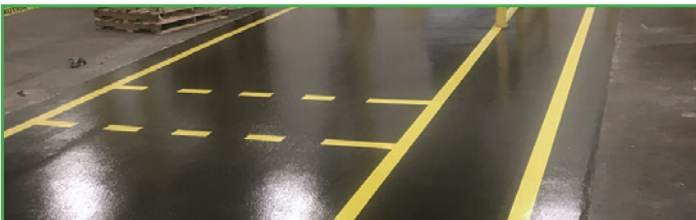

DEK-Guard™ Vehicular Deck Coating System

Fast Curing Vehicular Deck Coating Systems

DEK-Guard™ provides a quick curing, long-lasting, durable surface that protects substrates and stands the test of time. PU/MMA-based chemistry allows the system to cure in one hour at a wide variety of temperatures (-15°F to 90°F). DEK-Guard's flexibility allows movement within the parking structure while preventing surface cracking.

ISO-Guard™ Low VOC Coating System

Low VOC Hybrid Coating Systems

The ISO-Guard™ product line consists of alternate topcoats that can be used with many Res-Tek systems. Polyaspartics are fast curing, UV stable resins with no odor and low VOCs. High traffic urethanes have high abrasion resistance and are UV stable, allowing for a wide variety of installations.

PUR-Guard™ Cementitious Urethane Flooring

Cementitious Urethane Flooring Systems

PUR-Guard™ flooring systems are designed to be the choice alternative to acid brick and quarry tile in areas with extreme service temperatures that require high-performance and durability. PUR-Guard also performs well in heavy industrial manufacturing or processing facilities.

EPO-Guard™ High Solids Epoxy Flooring

High Solids Epoxy Flooring Systems

EPO-Guard™ is an economical and value-driven coating, providing a seamless, low-maintenance solution for a variety of environments. EPO-Guard is more durable and has improved UV resistance over other commercial grade epoxies on the market.

XCL-Guard™ Hybrid Flooring Solutions

Hybrid Flooring Systems

XCL-Guard™ hybrid flooring systems offer durability, thermal shock protection, and a variety of topcoats to fit the needs of any facility. The urethane cement base provides a strong foundation for applications that need more customization while still maintaining the necessary qualities of slip-resistance, a seamless finish, and an easy to clean floor.
